The National Oceanic and Atmospheric Administration's Climate Prediction Center Participates in the US-China Bilateral Scientific Exchange Program:

Vernon E. Kousky, NOAA scientist at the Climate Prediction Center, will be traveling to China (Beijing and Shanghai) to present a series of talks and hold discussions on Climate, Climate Monitoring and Climate Variability. The following presentations will be made: "The Global Monsoon" and "The ENSO Cycle" (19 September, CMA-Beijing), "The Diurnal Cycle of Precipitation based on CMORPH" (20 September, CMA-Beijing), "The ENSO Cycle" and "The Diurnal Cycle of Precipitation based on CMORPH" (23 September, Shanghai Meteorological Bureau), and "The ENSO Cycle" (26 September, Shanghai Astronomic Observatory). This trip is part of the US-China bilateral scientific exchange program. The China Meteorological Agency is hosting the visit.
